Wisconsin Legacy Communities Strategy Options							
The purpose of the strategy options matrix is to provide a broad list of best management practices that encompass several elements of sustainability including transportation, energy, land use, water, and waste. This list is not inclusive.							
Prospective signatories should use the strategy options to gauge environmental performance and then use this baseline to strive for superior results.							
Superior environmental performance may be achieved when municipalities use the strategy options to develop a sustainability plan that reduces their overall negative impact on the environment.							
TRANSPORTATION DEMAND MANAGEMENT:							
Transportation demand management strategies aim to reduce GHG emissions and VMT by influencing change in individual behavior. These strategies encourage walking, bicycling, and transit as modes of transportation within a community and seek to curb the number and length of trips by vehicle.
